Data Sources

The statistics published in this release relate to applications for 24+ Advanced Learning Loans for courses starting in the 2013/14 and 2014/15 academic years.

The data used to produce this monthly report are sourced from the Student Loans Company (SLC) application database. It should be noted that the data refer to all received applications (both unprocessed and processed, but excluding those ineligible, cancelled, deleted and in data entry) for 24+ Advanced Learning Loans. Therefore, application figures are not necessarily indicative of actual learner starts.

The data used in this report are sourced from an operational database that is updated on an ongoing basis, and therefore month to month application figures may fluctuate due to further processing of received applications. This may sometimes result in total application figures from launch in a particular table category increasing more or less than would be expected based on the previous month's submitted applications, or even decreasing from one month to the next.

As a part of the Skills Funding Statement released on 10th February 2014, it was announced that **Apprenticeships are to be removed from the 24+ Advanced Learning Loans system, and regulations came into force on 7th March 2014**. However, data from applications for Loans to fund Apprenticeships in the 2013/14 academic year are to be included in this report until they are removed from the SLC applications system.
